Delivery and operations

Linux · Apache · Nginx · Docker · GitHub Actions · CI/CD · Deployment · Rollback and release validation

Databases

MySQL · MariaDB · PostgreSQL · SQL Server

Frontend and supporting

JavaScript · TypeScript · React · Blade · Livewire · HTML · CSS · WordPress · WooCommerce

PROFESSIONAL EXPERIENCE

S/N Insurance was a full-time role with a fixed 08:00-16:00 schedule. The other overlapping roles used flexible, deliverable-based schedules, with work organized independently around agreed responsibilities and deadlines.

Senior PHP Developer / Server Administrator · Niipit IVS, Denmark

December 2016 – Present

Full-time | Flexible, deliverable-based schedule

Maintain a broad portfolio of production PHP, Laravel, WordPress, and WooCommerce applications across six servers for an international remote client.

Modernize legacy PHP applications and migrate systems to newer PHP and Laravel versions while preserving business-critical workflows

Implement Stripe and Danish online-payment integrations for customer-facing commerce systems

Own deployments, backups, security and performance improvements, and production incident recovery across Linux infrastructure

Head of IT · S/N Insurance Broker AD Bitola

November 2018 – January 2025

Full-time | Fixed schedule, 08:00-16:00

Led IT operations, application support, infrastructure, reporting, backups, and vendor coordination across six related companies serving more than 200 employees.

Supported more than 10 internal applications and databases covering departmental insurance, reporting, and operational workflows

Integrated internal systems with external insurance-industry platforms and counterparties across North Macedonia

Improved backup, recovery, access-control, and operational-continuity procedures while coordinating two external technology vendors

Laravel Developer · NicheStack, Czechia

November 2020 – June 2022

Full-time | Flexible, deliverable-based schedule

Developed and maintained at least 10 Laravel applications supporting SEO and digital-marketing operations.

Built backend features, database workflows, internal tools, and production changes across multiple client applications

Handled deployments, production maintenance, incident investigation, and incremental application improvements

SELECTED ENGINEERING PROJECTS

Razbudise

[Case study](#)

PHP, Laravel, PostgreSQL, Next.js, TypeScript

Editorial workflow and publishing platform with explicit assignments, approval and rejection states, traceable decisions, and draft-only delivery.

BuildIQ

[Case study](#)

Python, FastAPI, PostgreSQL, React, TypeScript

Construction-management product foundation with tenant-aware authorization, subscription enforcement, production gates, and 172 automated backend and frontend tests.

MediaHub

[Case study](#)

PHP, Laravel, React, TypeScript

Movie and television tracking product covering viewing state, discovery, diary, collections, imports, responsive interfaces, and privacy-aware social features.

EARLIER EXPERIENCE

Front-End Developer · Technology Solutions for Business Automation (TSBA)

January 2017 – September 2019

Full-time | Flexible, deliverable-based schedule

Delivered at least five complete customer-facing web and hybrid mobile applications using HTML, CSS, JavaScript, AngularJS, and Ionic.

Chief Technology Officer · Intel Marketing (WEHOO)

February 2013 – November 2016

Led web development, infrastructure, client implementation, technical delivery, and project coordination.

PHP / Joomla Developer · The Nova Code

November 2012 – February 2013

Developed and maintained PHP/Joomla websites, e-commerce customizations, and HTML/CSS interfaces.

EDUCATION AND TRAINING

IT Academy Alexandria

September 2009 - June 2010

Web Design and Internet Technologies training, including CIW and Adobe web-design certifications.
